sayint ™

A ZEN3 Product

SMART INSIGHTS FROM CONVERSATIONS

Sayint, Zen3's conversational analytics platform, uses cutting-edge AI, ML, and NLP to generate smart insights from customer conversations. We help businesses leverage their speech data to drive efficiency, increase revenues, enhance customer experience, and ensure compliance.

Aiming to be a leading SaaS platform for conversational analytics, we transform your vast repositories of customer interaction data into actionable intelligence by analyzing 100% conversations.
